

Fire Extinguisher Information:

Loveland Fire Rescue Authority doesn't maintain or refill fire extinguishers. If you are in need of this service, you can do a search on the internet or in a phone book using the key words: *Fire Extinguishers* for a list of contractors in your area.

Smaller household fire extinguishers can be purchased at various department / hardware stores. These type of extinguishers typically cannot be refilled and have an expected shelf life of about 10 years.

Unwanted fire extinguishers to be discarded can be taken to the [Larimer County Landfill](#) or [Loveland Recycling Center](#) for proper disposal.

There is a lot of information on the web on the basics of fire extinguishers, including how to use them, what types, etc. Here is a web site from [Fire Extinguisher 101](#) that has some key information to review and consider. Also, FEMA has a video: [How to Use a Portable Fire Extinguisher Training Video](#).
