AGENDA ITEM: 1
MEETING DATE: 6/11/2013
TO: City Council
FROM: Brent Worthington, Finance Department
PRESENTER: John Hartman, Budget Officer

TITLE:

Presentation and Discussion of the 2014-2023 City of Loveland Capital Program

DESCRIPTION:

The Capital Program is part of the 2014 Budget development process. The program includes the funding sources available for capital projects and the recommended projects for each year of the ten-year program.

SUMMARY:

The Loveland City Charter requires the City Manager to present, with the budget, a program of proposed capital projects for the ensuing year and four fiscal years thereafter. For planning purposes, staff has expanded this requirement and presents a ten-year program. The 2014-2023 Capital Program is the funding plan for all infrastructure and equipment replacement for both General Fund agencies and the Enterprise Funds. General Fund agency programs focus on transportation (both new construction and the rehabilitation of existing streets), new amenities, maintenance of existing facilities, and replacement of major equipment. In the Enterprise Funds, the focus is improving delivery systems through major maintenance or expansion of the delivery systems and treatment plants that provide and clean our water.

All projects included in the first year of the Capital Program will be included in the 2014 Recommended Budget, which will be presented to City Council in October. Projects included in the “out-years” (2015–2023) will be approved by Council in concept only. The Program will be updated annually to address specific needs as they arise, revise revenue streams based on more current projections, or as Council goals and policies change.

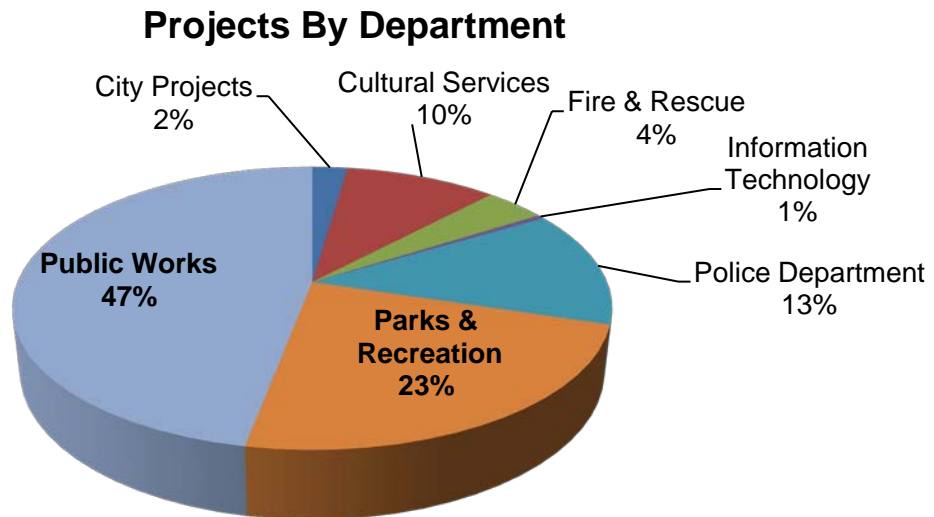

Over the ten-year period, the recommended projects for all funds total \$432.2 million in spending. Capital reserves available at the end of the program are estimated to be \$187.7 million. Reserve balances will depend on actual revenue collections through this time period. The largest revenue source for the capital program is impact fees at \$135.7 million. Actual revenue will be dependent on the rate of growth within the City. The other major source of funding is revenues generated by Enterprise rates and fees. These revenues, in many cases,

are weather dependent and fee rates will need to be addressed on an annual basis to ensure there is sufficient revenue under current conditions to fund the program.

The total City program is divided by General Fund Agencies and each enterprise, with a separate program for each.

General Fund Agency Program

Total spending over the ten-year period for the General Fund Agencies is \$158.5 million. Nearly 50% of the Program resides in the Public Works Department, primarily for street maintenance and construction. Project costs by department are shown in the graph below.

The largest single funding source for the General Fund Agency Program is Capital Expansion Fees (CEF). This source funds \$43.8 million of the total program. The fees fund new parks or parks expansion, new recreation amenities, open space acquisition, new street construction, a portion of the Museum expansion and a portion of the Police Training Facility.

Street maintenance and construction projects are the largest component of the Program and are shown in three major programs, Street Rehabilitation, the Transportation Program, and Bridge Repair. The total cost for these three programs over the ten year period is \$67.0 million.

The Street Rehabilitation program is for street reconstruction, pavement overlays, and concrete repair to curb and gutters. The Program is funded through the Transportation Utility Fee and a part of the State distribution of Highway Users Tax Fund (HUTF) revenues. The Bridge Repair Program is a five year program begun in 2013, funded by General Fund reserves. The Transportation Program is funded by Street Capital Expansion Fees and General Fund Reserves.

The Parks and Recreation Department has the second largest component, with 23% of the Program costs. Major projects over the ten year period are for:

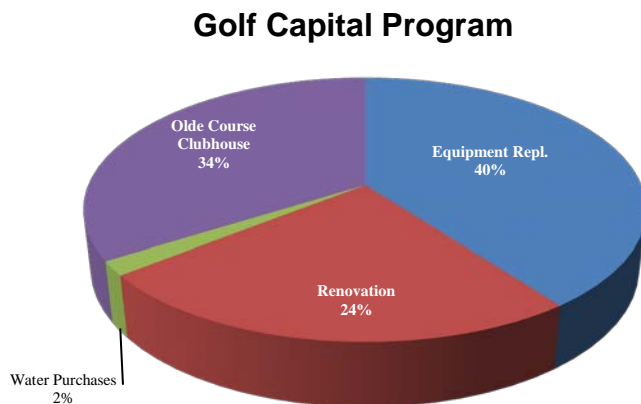

- Expansion of the Recreation Trail - \$3.0 million
- Open Lands Acquisition - \$16.9 million
- New Neighborhood Parks - \$4.0 million
- Expansion of the Loveland Sports Park - \$3.3 million
- A new Spray Park - \$3.2 million
- Expansion of Kroh Park - \$2.2 million, and
- Park Improvement Projects - \$1.0 million

The third largest component to the Program this year is in the Police Department with \$21.1 million in funding for replacement of the Records Management System, and the design and construction of a new Training Facility. The facility will include a shooting range, a driving course, and classroom space. The site and final scope are still being determined and project costs will be updated in future Programs as better estimates become available.

Enterprise Funds Programs

Golf Enterprise

The major focus of the Golf Enterprise Capital Program is on equipment replacement for the three courses. Over the ten year period, \$3.5 million is allocated for equipment. Construction of a new clubhouse at the Olde Course, along with a new maintenance building is programmed at \$2.9 million, with construction on the Clubhouse to begin in 2023. Renovations and infrastructure construction for the three courses is programmed at \$2.1 million.

Power Enterprise

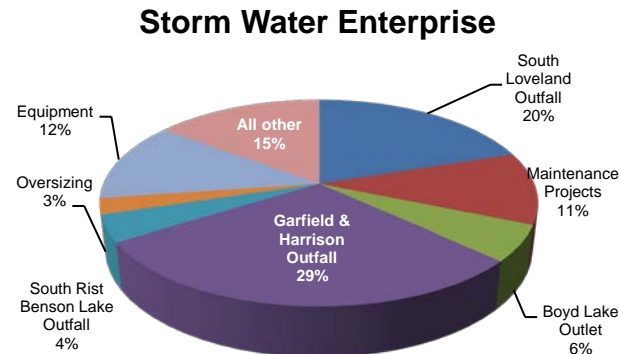

The focus of the Power Enterprise Capital Program is to improve system reliability. Total program costs over the ten-year period are \$92.9 million. Nearly one-half of the funding for the Program is from rate revenue. Another third is from impact fees (Plant Investment Fees, PIF).

General system improvements are the largest category at 26% of the total program at \$24.5 million. Substations both new and improved are programmed at \$17.2 million or 19% of the program cost. Replacement of 200 amp cables to ensure reliability is 13% of the total cost at \$12.1 million. The Aid to Customer Service Program for new construction, funded by developers, is 12% of the program at \$10.7 million over the ten year period.

Storm Water Enterprise

In the near term, the Enterprise's primary focus will be on maintenance projects and equipment replacement with each programmed at \$2.5 million in the first five years with a total Program cost in the first five years of \$11.3 million.

Over the ten year period total program costs are \$40.4 million and the major projects are:

- The Garfield and Harrison Outfall, programmed at \$11.6 million with construction 2021 and 2023;
- The South Loveland Outfall programmed at \$7.9 million with construction in 2020;

- \$4.5 million in maintenance projects; and,
- \$5.0 million in new equipment and equipment replacement.

Wastewater Enterprise Program

The total Wastewater Capital Program over the ten-year period is \$61.9 million. New Colorado Department of Public Health and Environment (CDPHE) regulations requiring significant upgrades to the Wastewater Treatment Plant are driving over one-third of the cost. Under current regulation, these improvements will

need to be completed by 2017. The other main focus of the program is on continued treatment plant improvements, sludge handling, and sewer line rehabilitation.

Due to the timeline necessary for the CDPHE projects, the Enterprise is forecasted to be short of revenue by \$7.2 million in 2017 and will continue to have negative fund balance through 2019. Staff will be discussing funding solutions with Council prior to 2017 when there is the most significant cost. There is also a possibility that the timeline may be extended further out in the program, depending on the final CDPHE regulations.

Raw Water Enterprise

The Raw Water Enterprise Capital Program totals \$30.0 million over the ten-year period, nearly all of which is programmed for the Windy Gap FIRMing Project. The new reservoir is currently planned for construction in 2016 and the total cost of the project is \$23.8 million. Another \$5.6 million is allocated for additional Big Thompson Water purchases to add to our portfolio.

Water Enterprise

The Water Enterprise Capital Program totals \$70.4 million over the ten year period. As we have

discussed with Council in the past year, over one half of the cost is programmed for expansion of the Water Treatment Plant at \$18.8 million and for water line replacements at \$20.0 million. New or oversized lines, new water storage tanks and a new booster station make up the rest of the Program.

Issues

1. As discussed earlier, the new CDPHE regulations regarding wastewater treatment are the biggest issue. The current timing of the project will leave the Enterprise short \$7.2 million in 2017. If this time-line holds, staff will need to discuss funding options prior to 2017. These options could include:
 - Short term rate increases. Under current projections, the fund will return to a positive fund balance in 2020, so a rate increase for the years 2017-2019 or a surcharge during these years to cover the cost could be implemented.
 - The Enterprise could borrow the funding required either through an external loan or an interfund loan. An interfund loan would depend on the availability of reserves in another fund that would not restrict that fund's capital program.
 - Reducing or moving further out in the program other treatment plan and line rehabilitation projects so that funds are available for the CDPHE projects.
2. There is not enough Cultural Capital Expansion Fee revenue to fund the Museum Expansion Project. A portion of the project is funded with General Government CEF

revenue. In addition, the project is dependent on \$10 million in outside funding in order to be completed under the current scope. The timing of the placement in the Capital Program is to help provide impetus to the fundraising effort. However, construction will not begin on the project until the entire \$10 million has been raised, so the actual timing of the project may be different than shown in this Program.

3. There is not enough Police CEF revenue to fund the new training facility. Staff is recommending filling the gap with Tabor Revenue reserves and General Fund undesignated reserves. The amount shown in the program is a preliminary, conservative estimate on the cost. The Department has issued an RFP to bring on a consultant to help define the location and the scope of the project. We anticipate the cost will be reduced to some degree from this effort. The cost will be updated in the 2015 Budget development process to include the results from this effort.

Included in the packet is the Recommended Capital Program, with detailed project description sheets for all projects within the Capital Program and large page format for the various spreadsheets included in the chapter.

REVIEWED BY CITY MANAGER:

LIST OF ATTACHMENTS:

2014-2023 Capital Program
PowerPoint Presentation

Capital Program

Introduction

The Loveland City Charter requires the City Manager to present, with the budget, a program of proposed capital projects for the ensuing year and four fiscal years thereafter. For planning purposes, staff has expanded this requirement and presents a 10-year program. The 2014-2023 Capital Program is the funding plan for all infrastructure and equipment replacement for both General Fund agencies and the Enterprise Funds. General Fund agency programs focus on transportation (both new construction and rehabilitation of existing streets), new amenities, maintenance of existing facilities, and replacement of major equipment. In the enterprise funds, the focus is on improving delivery systems through major maintenance or expansion of the delivery systems and treatment plants that provide and clean our water.

All projects included in the first year of the Capital Program are included in the 2014 Recommended Budget, which will be adopted in October. Projects included in the “out-years” (2015–2023) will be approved by Council in concept only. The Program will be updated annually to address specific needs as they arise or as Council goals and policies change.

General Fund Agencies

The 2014-2023 Capital Program for General Fund agencies is a financial program for the City to maintain existing facilities and infrastructure and meet the needs for new facilities and infrastructure. These projects are funded through taxes, impact fees, or other special revenues. Capital projects for the purpose of the Capital Planning process are defined as projects or equipment that have a cost of \$250,000 or greater. In some cases, such as the Facility Major Maintenance Program and the transportation construction and maintenance programs, individual projects may be less than this threshold, but the program as a whole meets the definition, and the program has a significant total cost to be included in the capital planning process. A significant portion of the funding for the Program is from dedicated resources. The City follows a “Pay-As-You-Go” philosophy. This requires funds to be accumulated in reserves until the total cost of a project has been received.

Revenues

CEFs are a major funding component at 32% of the total program. These are fees on development paid to the City to fund the infrastructure required to maintain service levels in the City as it grows. The City has ten different CEF fees, with one for each major service area. These are a Cultural Services Fee, Fire Fee, General Government Fee, Library Fee, a Law Enforcement Fee, Parks Fee, Open Space Fee, Recreation Fee, Trails Fee, and Streets Fee. The Cultural Services, Library, Parks, Recreation, Open Space and Trails fees are charged to residential construction only. All other fees are charged to both residential and commercial development. Revenues from each fee are restricted to be used for new capital construction within the specific service category. As a result, most of the fee categories will carry significant ending balances that are accumulated for future capital projects.

2014-2023 Capital Resources

The decline in building activity has significantly reduced CEF collections in the past three years, and, due to the recession, a recovery to the levels experienced in 2004-2007 is not expected in the near term.

The revenue assumptions for the CEF fees are based on projected building activity. An analysis of CEF collections compared to building permit inspections shows that most CEF fees from residential building are collected within the same year as the building permit revenue is received. However, for CEFs from non-residential projects there is a two-year lag between building permit collection and the CEF collections. In the City ordinance establishing the CEF fees, the fees are to be increased annually for inflation based on the construction index reported by the Engineering News and Report, for most fees, and a blended index created and reported by the Colorado Department of Transportation for the transportation fee.

A major source of funding for the Capital Program, at 21%, is from General Fund resources, which include General Fund tax revenue or fund balance, the TABOR reserve, and the Council Capital reserve that dedicates 2.5% of tax revenue below the TABOR limitation for capital projects through 2021. The availability of General Fund resources is linked to the Financial Master Plan, which programs both capital and operating funding related to capital projects.

All General Fund Sources

Within the Transportation Fund the most significant revenue is the Transportation Fee charged to all households and businesses. This fee is collected to partially fund the Street

Rehabilitation Program, which includes pavement overlays, street reconstruction and curb and gutter repair. A portion of the State distribution of Highway User Tax Funds (HUTF) completes the funding for the program. For the Transportation Program that consists of new street construction or street widening projects Tabor Reserves from the General Fund are combined with impact fees to fund the program.

Expenses

The Capital Program Summary has three subgroups of capital expenses. The “Infrastructure” subgroup includes all vertical construction, land purchases, park development, and street construction and maintenance. The “Software and Technology Projects” subgroup includes all technology related software and hardware projects. The “New & Replacement Equipment” subgroup includes the purchase of new fire apparatus or heavy construction equipment, and the replacement of major equipment. For the purpose of Capital Program planning, equipment considered within the plan has a cost of \$250,000 or greater. Equipment used within the General Fund agencies with a cost below \$250,000 will be prioritized and budgeted within the operating budget process.

2014-2018 Capital Program

All Building Project costs in 2014 are in current dollars. Park project costs are in current dollars throughout the plan. Changes in scope may need to

occur to keep park projects within the cost estimates shown. Economic conditions and Council priorities will change over time and are difficult to forecast over a 10-year period. A 5-year period is manageable, although all costs are still projections or estimates. For this reason, the discussion will focus on the first five years of the plan.

The allocation of funding by project type over the first five years of the recommended program is shown in the pie chart on the previous page. It demonstrates the Council commitment to transportation with street construction and maintenance being nearly one-third of the total resources allocated in the program.

General Fund Agency Capital Projects Descriptions

The following is a summary of the major projects:

Bricks & Mortar

- **Downtown Improvements:**
 - **Downtown Infrastructure Improvements** – An average of \$1.0 million is programmed annually in 2014-2017 for improvements to the infrastructure downtown. The funding source is General Fund revenues from the Council Capital Reserve.
- **Trail Construction** – \$1.9 million is programmed over the next five years for construction of the bike/hike trail that will circle the City upon completion. The funding sources are Colorado Lottery Funds and Trail CEFs.
- **Open Land Acquisition** – \$15.1 million is programmed over the next five years for the purchase of additional open space around the City. The funding sources are the Open Space Impact Fees and the County Open Space Sales Tax.
- **Facility Maintenance Projects** – Most of the City facilities are now over 20 years in age and will require an increased maintenance effort. This will include roof replacements, upgrades or replacement of heating and cooling systems, carpet replacement, and general repair. The City will invest nearly \$2.9 million towards this effort over five years using General Fund revenues.
- **Transportation Program** – \$8.0 million is programmed over the next five years for construction and renovation of the City streets, based on the 2030 Transportation Plan. The funding sources are the Streets CEFs and General Fund revenues.
- **Street Rehabilitation** – \$23.3 million is programmed over the five-year period for rehabilitation of existing streets. The funding source is HUTF revenues and the Transportation Utility Fee.
- **Museum Expansion** – A 26,000 square foot expansion is planned at a projected cost of \$15.5 million. The funding source is Cultural Services CEFs, General Government CEFs and \$10 million in grants and private contributions.
- **Police Training Facility** – A new training facility is programmed in three phases. The first two phases, programmed in the five year program, include a shooting range and driving track.
- **Loveland Sports Park Phase II** – Development of the next phase of the Loveland Sports Park is scheduled for 2014-2015 at a cost of \$3.3 million. The funding sources are Park CEFs and Recreation CEFs.
- **New Spray Park** – This project would include the addition of a spray/splash park in Loveland. There is a continued demand for outdoor aquatics amenities as Winona Pool is at capacity on many summer days

Software and Technology Projects

- **Police Records Management System** - \$3.0 million is planned to replace the existing system that has aged to the point it will no longer be compatible with existing operating platforms.
- **Telephone Switch Replacement** – The existing system has aged to where maintaining h system has become an issue. The City will move to a new Voice Over Internet (VOIP) protocol for the telephone system.

New & Replacement Equipment

- **Fire Apparatus Replacement** – \$2.7 million is programmed for the replacement of fire apparatus in the five-year period. As this equipment is replaced, it will be placed in the Fleet Fund, with future replacement costs amortized over the life of the equipment. The amortization will be charged to the Loveland Fire Rescue Authority operating budget. The funding source is General Fund revenues.

Enterprise Funds Agencies

The Enterprise Fund Capital Program is funded through revenues derived from rates on usage and impact fees called System Impact Fees (SIFs) or Plant Investment Fees (PIFs). Like the Capital Expansion Fees (CEFs) used in the General Fund Agency Capital Program, these are fees paid by development to offset the impact of new infrastructure from the new development on the system.

In 2014, the Water Enterprise is recommending a 9.0% increase in water rates to fund capital improvements for both the treatment plant and the distribution system over the next ten years. The distribution system is aging and failures have increased at a significant rate. The capital program focuses on replacing this infrastructure in the first five years of the plan, with most expansions occurring in the second five years. The treatment plant will have extensive projects to expand capacity since the City has been reaching its maximum output during the summer in the past two years.

Enterprise Fund Capital Projects Descriptions

The Water Enterprise Fund provides for the treatment and distribution of water to City residents and businesses. Major projects over the five year planning period include:

- \$18.8 million is allocated for projects to improve and expand the treatment plant operations and improve reliability.
- \$5.6 million is allocated over the planning period for water line replacements
- \$3.1 million for 24" and 16" lines in the East Gravity Zone to maintain adequate pressure on the east side of the City.

The Raw Water Enterprise Fund provides for the acquisition of water and storage facilities to insure the City has an adequate water supply. Major projects include:

- \$23.8 million for construction of a new reservoir in partnership with several Front Range cities. Loveland's share of the project will add 7,000 acre-feet of storage for the City. This project is partially funded by an annual 1% increase in water rates.
- \$2.2 million is allocated over the 5-year period for additional water purchases so the water supply will keep up with growth in the City.

The Wastewater Enterprise Fund collects and treats all water used by City residents and businesses, except for irrigation, and treats the water so it can be returned to the river for downstream users. Major projects include:

- \$26.0 million for treatment plant expansion and improvements to meet new state and federal regulatory guidelines.
- \$5.0 million is allocated in 2014-2015 for the new sewer line along the State Highway 402 corridor.
- \$1.5 million is allocated for Boyd Lake interceptor projects to handle planned growth in the northwest part of the City.
- \$1.1 million is planned for sewer line rehabilitation projects and corrosion control.
- \$1.1 million for the East and West Channel Bar Screen Replacement to ensure trash and other detritus from entering the treatment plant.

The Power Enterprise Fund provides electricity to all City residents and businesses. The focus of the program is to maintain the high reliability ratings the City has achieved over many years. Major projects include:

- \$6.4 million for upgrades to one hydro-electric generation plant the City owns.
- \$5.9 million in system improvements.
- \$5.5 million to construct the Highway 402 Feeder extension.
- \$4.7 million for projected growth due to new construction. These projects are initiated and paid for by developers.

- \$3.8 million for 200 Amp Cable Replacement Projects.
- \$2.9 million for new components and a feeder extension at the Valley Substation.
- \$2.8 million is allocated for a project to convert electric service in the Thompson Canyon to 12.47 KV voltage to add reliability in the Canyon.
- \$2.4 million for underground conversion projects.
- \$1.9 million is allocated for street light improvements and maintenance.
- \$1.7 million is allocated for feeder line extensions.
- \$1.5 million is allocated for power line relocations driven by new street construction projects.
- \$1.3 million for new components and a feeder extension at the Horseshoe Substation.
- \$1.0 million for new components and a feeder extension at the West Substation.

The Storm Water Enterprise Fund collects the runoff from City streets for return to the river, to minimize flooding and improve traffic safety. Major projects in the next five years include:

- \$2.5 million is allocated for maintenance projects.
- \$2.5 million for the replacement of street sweeping and maintenance equipment.
- \$1.9 million is allocated for the South Loveland Outfall Phase III.
- \$1.3 million is allocated for Airport Basin Master Plan improvements.
- \$1.0 million is allocated for the Silver Lake drainage improvements.

The Golf Enterprise Capital Program is for improvements to the three City owned courses and their amenities, and the equipment needed to maintain the courses. Major projects in the next five years include:

- \$2.4 million for equipment replacement.
- \$1.1 million for renovations, repairs and infrastructure at the courses.
- \$0.6 million for improvements to the Olde Course Clubhouse and Maintenance Buildings.

2014-2023 All Funds Recommended Capital Program

	2014	2015	2016	2017	2018	Five Year Total
Capital Projects Fund	7,336,110	2,777,580	6,344,800	24,976,860	4,113,840	45,549,190

Note: CEF funds are restricted to use, and while shown in the total bottom line, may not be able to appropriate for certain projects. The same is true for Special Revenue funds. The impact is there will be a larger reliance on general funding than there are funds available, while there will be significant ending balances in the restricted funds.

Museum Expansion

Department:
Cultural Services / Public
Works

Division:
Museum

Project Manager:
Ken Cooper

Phone Number:
970.962.2635

Email:
ken.cooper@
cityofloveland.org

Project Category:
TBD

Project Number:
TBD

Duration:
2016- 2017

**Total Project
Cost:
\$15,520,960**

About the Project

Museum and Facilities Management staff have completed an assessment of exhibit, programming, and collection storage needs. The needs have increased substantially since the recent loss of the Home State Bank for collection storage and classes.

The proposed expansion to the south would approximately double the current space of 27,000 square feet, providing an architecturally and culturally significant venue for Loveland's historic core. The Museum has always been on its current site—integral to downtown and important to Loveland's historic identity and its reputation as an arts community.

Amenities would include: new history and art galleries; Age of Bronze exhibit; children's mini-museum; public plaza/sculpture garden; lobby/reception event space; auditorium; classrooms; pottery and print studios; Fire exhibit; research library; gift shop and rooftop event patio.

With an outside fundraising requirement of \$10 million for the project, construction will not begin until the necessary outside funding has been obtained.

Figures below assume:

10% for design/architecture/engineering; 70% for construction; 7% for furniture/fixtures/equipment; 3% for permits/fees; 10% for contingency

\$4,568,260**

About the Project

In 2013,
the new

station construction began for the northwest part of the City. The placement of the old station did not provide adequate service or response to the north and northwest part of the district. The best option for serving the community was to move Station 2 from Taft Avenue to Wilson Avenue and 29th Street and place a second heavy rescue truck company at the Station, increasing coverage to meet a growing service need. The land was purchased in 2012 for \$99,790. The four bay station is expected to be 14,000 sq. ft. (up from 11,885 sq. ft.) with a total development cost is \$3,801,970. The heavy rescue truck and related service equipment was purchased in 2013 for \$666,500.

Total 2014 operations costs include personnel and equipment (uniforms, communications equipment, bunker gear, wild land gear, and self-contained breathing apparatus) for six new firefighters, the promotion of six engineers, and the promotion of three lieutenants for a half of a year, heavy rescue vehicle maintenance and amortization, and additional facilities cost.

About the Project

Replacement of existing fire apparatus.

The replacements are as follows:

2014: 2000 Smeal Ladder Truck – Truck 6

2015: Refurbish the 2000 Smeal Ladder Truck for reserve status

2016: 2004 General Spartan Engine

Replacements starting in 2017 are the responsibility of the Loveland Fire Rescue Authority.

Construction of a New Fire Station 10 and Apparatus For West Coverage

Department:
Loveland Fire Rescue
Authority

Division:
Suppression

Project Manager:
Randy Mirowski

Phone Number:
970.962.2827

Email:
Randy.Mirowski@
cityofloveland.org

Project Category:
Construction & Equipment

Project Number:
TBD

Duration:
2018

**Total Project
Cost:
\$2,605,000**

About the Project

There is need for a station on the west side of the service area to improve response times to meet the 5 minute 59 second standard. It is anticipated that this station would be as far west as Glade Road. The calls dispatched would lessen the impact on Station 3 and Station 2 allowing them to be more responsive to the urban response area.

This is anticipated to be a 9,000 square foot station with \$225 per square foot in construction costs and \$580,000 in site development and other costs.

The staffing for this station would include six firefighters (three for the station assignment and three rovers system-wide), three Engineers and three Lieutenants. Since the Engineers and Lieutenants would be promotional positions, twelve Firefighters would be hired, six Engineers would be promoted (three for the station and three to backfill promotions to Lieutenants), and three Lieutenants would be promoted. Operations costs noted below include the costs of equipping firefighters and maintaining the new facility.

Telephone Switch Replacement

Department: Information
Technology

Division: Telecommunications

Project Manager: Bill
Westbrook

Phone Number: 962-2330

Email: bill.westbrook
@cityofloveland.org

Project Category:
Equipment

Project Number:
TBD

Duration:
2014

**Total Project
Cost:
\$750,000**

About the Project

Replacement of all Rolm/Siemens TDM (time division multiplexing) telephone switches with VOIP (voice over internet protocol) replacements. Switches currently exist at the Civic Center, Fire Administration Building (FAB), Police/Courts, Airport, and Service Center facilities. Avaya VOIP switches presently exist at the Rialto Theater Center (RTC) and at the Civic Center (only to support the RTC). This project will replace all the TDM switches and possibly the existing small VOIP switches, depending on the solution selected. Two major features this technology provides for the City is "follow me call forwarding" and "unified messaging". The cost includes the equipment as well as installation and training.

The Rolm equipment was purchased in 1987 and has reached its end-of-life.

cityofloveland.org

Project Category:
Construction

Project Number:
TBD

Duration:
2017

About the Project

The Cemetery Shop (1,893 Sft.) was constructed in 1968 and serves as an office area/public meeting place (sales and burial arrangements) and maintenance shop. The 45-year old structure is in need of significant upgrades/repairs to meet ADA requirements and to meet public office/maintenance shop needs. Plans include demolition and removal of the maintenance shop from the site and conversion of the building footprint to traditional burial lots for sale to the public. Construction of a new 2,200 SFT building will occur near the cul-de-sac west of the existing shop. Estimate includes state permits, mitigation, building demolition/disposal, site grade work, irrigation, and landscaping.

About the Project

Replace the current Records Management System and Automated Field Reporting System (RMS/AFR). Project will include the design, implementation, data transfer, and training necessary.

The current RMS/AFR is 16 years old and is nearing its end of life cycle. All other RMS/AFR systems regionally have been replaced at least once if not more in that time frame.

Maintenance Operations Center Remodel

Department:
Public Works

Division:
Facilities Management

Project Manager:
Ken Cooper

Phone Number:
970.962.2635

Email:
ken.cooper@
cityofloveland.org

Project Category:
TBD

Project Number:
TBD

Duration:
2015

**Total Project
Cost:
\$635,730**

About the Project

When the Streets, Solid Waste, and Stormwater divisions move from the Maintenance Operations Center (MOC) to the completed Service Center Expansion in 2014, it will allow significant changes to the MOC to better service the Traffic and Facilities Management (FM) divisions. COLT will also move its operations from the FAB to the MOC. FM expects to program and design the space internally, so there will be limited design/architecture/engineering costs. One major change to the building that these project costs do not include is the creation of a full-scale Traffic Operations Center. Traffic worked with FM in 2011 on this project and the costs to create this TOC were kept separate from the specific remodel costs needed and shown below.

The figures below assume...

- 5% for design/architecture/engineering
- 75% for construction
- 7% for furniture/fixtures/equipment
- 3% for permits/fees
- 10% for contingency

Project Category:
Street Resurfacing

Project Number:
ENSR09

Duration:
2014-2023

**Total Project
Cost:
\$49,524,860**

About the Project

The City budgets for annual street maintenance costs. Projects consist of street resurfacing, major reconstruction, concrete rehabilitation, and cul-de-sac repairs. Funding for the Program is from the Transportation Fee charged to residential and commercial buildings and General Fund resources. This Program significantly extends the life of City streets; improving the ride-ability and reducing the reconstruction costs of existing streets.

2014-2023

**Total Project
Cost:
\$2,660,000**

About the Project

Description: Repair of cul-de-sacs at the terminus of streets scheduled for other pavement maintenance activities. Normal chip and seal or other surface maintenance operations are not durable in cul-de-sacs. A separate contract is used to upgrade these features. Based on repair of 14-16 cul-de-sacs, annually.

**Total Project
Cost:
\$5,750,000**

About the Project

An annual program to address deteriorating storm drainage infrastructure within the City. This program includes the replacement of inlets, manholes, storm sewers, channel re-grading, detention pond retrofits, and Stormwater quality enhancements. The annual funding is set at \$475,000 per year except in 2016 when it will be set at \$975,000 for one year. Projects are prioritized to remain within the allocation.

An additional \$75,000 per year is included for survey and geotechnical services.

**Total Project
Cost:
\$2,401,590**

About the Project

A project to mitigate existing erosion problems within the Boyd Lake Outlet Ditch between Eisenhower Blvd. and 5th Street, directly east of Kohl's. We jointly utilize this irrigation return flow ditch to convey storm water runoff to the Big Thompson River. In accordance with the 1984 agreement between the City and the Greeley & Loveland Irrigation Company, we are required to make necessary improvements to the ditch in order to convey storm water to the river.

2014- 2023 Transportation Program

The City of Loveland 2035 Transportation Plan (2035 Plan), adopted by City Council in December 2012, states that “a well-balanced, well-maintained transportation system is critical for sustaining Loveland’s high quality of life.” The purpose of the 2035 Plan is to “provide a document that guides transportation decision making toward a future desirable to the community of Loveland.” The 2035 Plan looks at all modes of transportation – bike, pedestrian, transit and vehicular – and includes recommendations, policies and strategies related to that purpose.

The funding for the projects included in the City of Loveland 2035 Plan comes from five (5) primary sources:

1. Capital Expansion Fees for Streets (Street CEF’s): The portion of the additional street infrastructure that can be attributed to growth within Loveland (new trips that have origins or destinations or both within Loveland).
2. Collector Street Equivalents: Development is required to fund up to the cost for a collector street equivalent for the portion of streets within and adjacent to their property.
3. Other: Primarily Federal and State Grants administered through the North Front Range MPO.
4. Centerra Metro District Funds: As part of the MFA, a portion of the street infrastructure included in the 2035 Plan will be constructed by the Centerra Metro Districts.
5. General Fund: The General Fund pays for portions of projects that will accommodate existing traffic, collector street equivalents for properties adjacent to City owned properties, and traffic that passes through Loveland (referred to as E to E or External to External Traffic). Basically, the General Fund covers costs that cannot be attributed to growth within Loveland (CEF’s), the collector street equivalent, or funding from others, including Centerra.

Each project included in the 2035 Plan is evaluated to determine the appropriate proportion from each of the above funding sources. In order for a project to move forward (a project is defined as overall or a specific phase), each funding source has to be whole.

Project prioritization is based on the criteria included in the 2035 Plan. The basis for the prioritization is an objective analysis of seven categories, weighted for importance. Those categories are: System Continuity, Congestion Mitigation; Safety Enhancements; Multi-Modal Enhancement; Implement-ability (ability to construct); Environmental Impact; Cost/Benefit; and Regional Significance (does it help regionally). The prioritization is centered on current needs and is looked at bi-annually.

In some cases, portions of a large project have a higher prioritization rating than other portions or the overall project. Our experience has been that Project Phasing is the key to addressing this issue. In the past, larger portions of projects were completed at one time by both the City and Developers. The current Transportation CIP includes a revised approach of addressing projects in smaller, “bite-size” pieces. Historically, this approach has not been a requirement of Development Projects, resulting in large projects being constructed that do not rate highly when compared to other projects. The result has been the build-up of significant reimbursement obligations. Consideration should be given to providing this information during the development process in order to steer phasing.

The City of Loveland’s Transportation Capital Program (TCP) is the programming of projects in order to implement the 2035 Plan. The development of the TCP includes consideration of three primary areas of projects:

1. Projects designed and constructed by the City.
2. Projects designed and constructed by Developers that are eligible for full or partial reimbursement as they were included in the 2035 Plan and necessary to meet the traffic needs of the specific development.

3. Planning projects for the future as well as opportunities to secure right-of-way or roadway corridors that avoid creating situations where properties have to be demolished for planned improvements, such as the Taft Avenue Project. (For example: Transportation Plan Updates; planning for future roadway corridors, including right-of-way acquisitions (A recent example is the Boyd Lake Extension from 5th Street to SH 60.)

Within the primary areas for projects are specific subareas or project groupings that are included in the overall TCP, and evaluated each year as part of the update of the 10 year TCP. These include:

1. Annual On-Going Projects: These projects include additional bike lane signing and striping, additional sidewalks and pedestrian facilities, unanticipated right-of-way opportunities (not associated with a project currently programmed), Traffic Signal System Interconnects, Upgrades to the City's Traffic Signal Control System, Transportation Plan Updates, School Zone Flasher additions, and Miscellaneous Bridge Repairs (as identified in the 2030 Plan).
2. Development Reimbursement Projects: Reimbursement to developers of their eligible costs for construction on certain projects (e.g. oversizing agreements).
3. Capital Projects with anticipated funding of less than \$500,000 per each over the next 10 years.
4. Individual Projects with funding over \$500,000 each over the next 10 years.
5. Capital Reserves: The Funding from specific sources that is either held in to cover an unanticipated shortfall in revenue (Street CEF's) or Funding that has been designated from a specific source but is not able to be utilized, as there is inadequate funding from other areas to keep the proportionate shares (General Fund).

Another part of the 2035 Plan and the City's overall transportation efforts is related to maintenance – taking care of the existing infrastructure investment. From an infrastructure perspective, protecting the existing investment is a very high priority, even higher than building additional infrastructure. As reported to City Council in 2008, the long-term funding needs for this program have identified a gap in the City's ability to keep up with the existing needs, even without adding anything new. A portion of that gap was addressed in the 2013 budget process. The detailed transportation maintenance plan (10 Year Street Rehabilitation Plan) is included in other parts of the CIP.

In the end, it is our opinion that it is more important to address maintenance than congestion but to not ignore the latter. It is anticipated that congestion levels will continue to grow as traffic growth outpaces revenue, but that specific congestion points (i.e. intersections) will be addressed with individual development projects. Until funding levels increase, specifically in the Street CEF area, this pattern will continue. As a result, we will see an increase in the amount of reimbursements owed developers until building permits, specifically commercial and office, increase. This is similar to the cycles we have seen in the past. However, focusing on phasing should help keep this from spiraling out of control, but only to a certain extent as developers' proposals significantly influence the true dynamic of this item.

Annual Program

Project Number:

NA

Duration:

2014-2018

**Total Project
Cost:
\$925,000**

About the Project

The overall Phase II improvements will consist of widening Taft Avenue to include left and right turn lanes as needed, bicycle lanes, curbs, gutters, medians and sidewalks. The bridge at the Big Barnes Ditch will also be

widened. The Taft Avenue / Eisenhower Boulevard intersection will be reconstructed with concrete pavement to decrease maintenance costs. A new traffic signal at the Taft/Eisenhower intersection will be constructed with the project. Additionally, storm sewer improvements will be made along the project limits. Through 2022, the right-of-way acquisition will be completed and portions of the project constructed, including the bridge at the Big Barnes Ditch and removal of existing houses. The remainder of the project will be constructed in additional phases as funding becomes available.

About the Project

The Madison Avenue Improvements Project includes the widening of Madison Avenue from Silver Leaf to 29th and improvements to the Madison Avenue / 29th Street Intersection. The phases of the project are design, right-of-way acquisition, and construction. This route is a major feed from northwest Loveland to US 34, east to I-25 and other locations. The initial phase will be the completion of the design. The second phase will be ROW acquisition. Upon completion of the ROW acquisition, the project will be constructed in phases as funding becomes available.

Work Order Number:
PW913-various work orders

Duration:
2014-2023

**Total Project
Cost:
\$1,466,410**

About the Project

These projects are related to minor upgrades to our overhead and underground distribution system where we have identified the need to change out utility poles, add or upgrade transformers, increase conductor/wire size, replace open wire pole to pole feeds and split electrical service loads to correct low voltage concerns and/or improve system reliability.

Power

Project Manager:
Kathleen Porter

Phone Number:
970.962.3561

Email:
Kathleen.Porter@cityofloveland.org

Project Category:
Construction

Project Number:
PW921

Duration:
2016-2017

**Total Project
Cost:
\$5,468,600**

About the Project

This new feeder will begin at South Boise Avenue and State Highway 402 and extend east to the west side of I-25. Its purpose is to pick up and serve the annexations of Ehrlich Addition, the Olson First and also the Olson Second Addition as well as any other new annexations that have been added to the City.

Windy Gap Firming Project

Department:
Water & Power

Division:
Raw Water

Project Manager:
Larry Howard

Phone Number:
970.962.3703

Email:
Larry.Howard@cityofloveland.org

Project Category:
Planning

Project Numbers:
W038AA

Duration:
2014-2016

**Total Project
Cost:
\$25,974,530**

About the Project

The Windy Gap Firming Project as currently envisioned will provide a total of 90,000 acre feet of storage to hold water developed in the original Windy Gap Project. It is anticipated the storage will be permitted in Chimney Hollow, the next valley immediately west of Carter Lake. Loveland's portion of the total is currently subscribed at 7,000 acre feet of storage. This storage will ensure that the City's 4,000 acre feet of yield from the original Windy Gap Project will be available to the City on a reliable, or firm, basis. Environmental permits are still pending.

Colorado Big Thompson Water Purchases

Department:
Water & Power

Division:
Raw Water

Project Manager:
Greg Dewey

Phone Number:
970.962.3717

Email:
Greg.Dewey@cityofloveland.org

Project Category:
Planning

Project Numbers:
W1014A

Duration:
2014-2023

**Total Project
Cost:
\$5,580,890**

About the Project

Colorado Big Thompson (CBT) Water Purchases are one of the identified ways in the City's Raw Water Master Plan to acquire additional water for the city. The city was successful in late 2011 and early 2012 in purchasing a relatively large amount of CBT at a reasonable price. This project is to plan for funds to allow flexibility and responsiveness to consider and execute purchases of CBT water should desirable opportunities occur.

Trade of Water Rights – 402 Corridor

Department:
Water & Power

Division:
Raw Water

Project Manager:
Larry Howard

Phone Number:
970.962.3703

Email:
Larry.Howard@cityofloveland.org

Project Category:
Planning

Project Numbers:
NA

Duration:
2019

Total Project Cost:
\$664,930

About the Project

The City (Raw Water Enterprise Fund) purchased water along Highway 402, formerly owned by Three "O"

Partnership. The water is described as 27 shares of Home Supply Ditch.

Water and Power staff has been considering ways for the City to use this water. One option is to trade the water to Johnstown. This water is the same type of water that Johnstown already makes use of; however, a change in Water Court would be required. Johnstown has other water carried in the Home Supply Ditch in which Johnstown gets a reduced yield. If and when a trade is accepted, the City (Raw Water Enterprise Fund) would dispose of this asset and the City (Raw Water Enterprise Fund) would acquire another asset (a different type of water right). Due to time involved in doing a Water Court transfer, the trade would not be expected until 2019.

Nutrient Treatment Facilities

Department:
Water & Power

Division:
Wastewater

Project Manager:
Michael McCrary

Phone Number:
970.962.3760

Email:
mccram@ci.loveland.co.us

Project Category:
Planning/Construction

Project Number:
NA

Duration:
2015-2017

**Total Project
Cost:
\$6,355,790**

About the Project

This project will provide additional treatment to remove nutrients and meet anticipated regulated nutrient criteria restrictions. Additional nutrient treatment facilities may need to be on line by 2016 to meet upcoming nutrient criteria for total nitrogen and total phosphorus. These criteria are mandated by the USEPA and are designed to lower algal bloom in all rivers in the nation in order to reduce oxygen demand from decomposing bio-matter.

Primary Clarifier

Department:
Water & Power

Division:
Wastewater

Project Manager:
Michael McCrary

Phone Number:
970.962.2572

Email:
mccram@ci.loveland.co.us

Project Category:
Planning/Construction

Project Numbers:
NA

Duration:
2018-2019

**Total Project
Cost:
\$3,026,980**

About the Project

This project will provide a treatment capacity increase of the primary treatment system to a 12 MGD maximum per month design to provide additional plant capacity for City growth. The primary clarifier will be constructed in the area now occupied by the decommissioned trickling filters.

NA

Duration:
2019-2021

**Total Project
Cost:
\$7,226,780**

About the Project

This project is recommended based on the 2007 Solids Management Study and will provide onsite dewatering capability to reduce the volume of digested biosolids hauled off site and reduce dependence on liquid waste hauling. This project will be built in the area of the WAS thickening building and will incorporate centrifuges for dewatering and solids cake loading into biosolids hauling trucks

Future Digester

Department:
Water & Power

Division:
Wastewater

Project Manager:
John McGee

Phone Number:
970.962.3760

Email:
mcgee@ci.loveland.co.us

Project Category:
Planning/Construction

Project Numbers:
NA

Duration:
2015-2017

About the Project

This project will add a third digester to the wastewater treatment plant to maintain current and anticipated solids treatment regulations. As loadings on the treatment plant increase, design and regulatory criteria will necessitate more digestion capacity.

Duration:
2015-2016

**Total Project
Cost:
\$1,083,290**

About the Project

Mechanical screening to remove rags, trash, and other detritus from the flow entering the wastewater treatment plant is the first treatment action taken by the plant. This step helps protect all downstream processes and equipment from clogs and equipment damage. This project will install a more robust screenings system to protect all plant processes.

mcgee@ci.loveland.co.us

Project Category:
Planning/Construction

Project Numbers:
NA

Duration:
2014

**Total Project
Cost:
\$1,450,000**

About the Project

The Digester Building was constructed in 1986. The relevant Fire and Electrical codes have been revised several times since then. Digester gas can be present in this building and special code compliance and safety measures are required. The safety of staff and plant neighbors necessitates that compliance with the updated codes be established.

Miscellaneous Oversizing and Extension Projects

Department:
Water & Power

Division:
Wastewater

Project Manager:
Melissa Morin

Phone Number:
970.962.3709

Email:
Melissa.Morin@cityofloveland.org

Project Category:
Construction

Project Numbers:
W1232H

Duration:
2014-2023

**Total Project
Cost:
\$910,970**

About the Project

As development on the fringes of the City occurs, private developers design and install wastewater infrastructure to serve their specific project. When the City anticipates additional capacity is desired to serve wastewater needs above and beyond that which is related to the proposed development, the Utility may require a larger pipeline to be installed by the Developer. The Utility reimburses the Developer for these increased costs through the Extension and Oversizing program. Future anticipated wastewater main alignment and sizes have been planned for in the Water/Wastewater Master Plan.

Email:
Craig.Weinland@cityofloveland.org

Project Category:
Construction

Project Number:
NA

Duration:
2014

**Total Project
Cost:
\$650,000**

About the Project

This project consists of rehabilitating approximately 2600 linear feet of 30-inch RCP for the portion of the interceptor located between S Lincoln and S Saint Louis Avenues which has experienced hydrogen sulfide corrosion. The rehabilitation of the Interceptor will consist of cleaning, videotaping, gasket and tree root cutting, pulling a Cured-In-Place-Pipe (CIPP) liner through the line, and reinstating active services. The project also includes the rehabilitation of manholes along the Interceptor line. Manhole restoration will depend on the corrosion level and may include removal and replacement or surface preparation and installation of a cured in places sulfide resistant lining.

Craig.Weinland@cityoflovela
nd.org

Project Category:
Construction

Project Numbers:
NA

Duration:
2014-2023

**Total Project
Cost:
\$2,429,250**

About the Project

Replacing aging infrastructure is a growing need within the utility. After several decades pass, wastewater mains and manholes reach the end of their service life and require increased maintenance and rehabilitation costs. In some cases, these costs can become unacceptably high and the utility is best served by rehabilitating the facilities. Typically, most communities face increasing rehabilitation costs as the age of installed infrastructure advances.

970.962.3715

Email:
Tanner.Randall@cityofloveland.org

Project Category:
Planning/Construction

Project Number:
NA

Duration:
2016-2017

**Total Project
Cost:
\$4,966,700**

About the Project

This project includes the design and construction of a new wastewater main to provide for future development along the Highway 402 corridor as well as the southeast corner of the City's wastewater service area. The main will be designed to maximize gravity flow, but will need a regional lift station to collect wastewater. A condition of annexation was agreed upon for the Olson Annexation that the City would provide wastewater service to the Annexation upon development.

North Horseshoe Lift Station Upgrades

Department:
Water & Power

Division:
Wastewater

Project Manager:
Roger Berg

Phone Number:
970.962.3711

Email:
Roger.Berg@cityofloveland.org

Project Category:
Planning/Construction

Project Numbers:
NA

Duration:
2018-2019

**Total Project
Cost:
\$911,330**

About the Project

Upgrades to the existing lift station will increase pumping capacity to provide adequate sewer service to potential development and population growth in areas north of Horseshoe Reservoir. Design will include a condition assessment, adding a 3rd pump, and verifying whether to serve the existing Lago Vista Mobile Home Park.

South Side Lift Station Force Main to WWTP

Department:
Water & Power

Division:
Wastewater

Project Manager:
Tanner Randall

Phone Number:
970.962.3715

Email:
Tanner.Randall@cityofloveland.org

Project Category:
Planning/Construction

Project Numbers:
NA

Duration:
2018-2019

**Total Project
Cost:
\$1,848,790**

About the Project

The South Side Lift Station was constructed in 1983 in anticipation for significant growth in the southeast portion of the City. Due to growth occurring in other areas of town, the force main and lift station are currently oversized. The oversized facilities cause the pumps to only operate once every hour and much less frequently at night. The force main discharges directly to the wastewater treatment plant (WWTP). The large force main, infrequent pumping and proximity to the WWTP cause large surges which overwhelm and complicate the treatment process. The proposed project will add a smaller force main and pumps allowing discharges to the WWTP to be smaller and steadier resulting in less strain and improved efficiency at the plant.

East Side Discharge Trunk to WWTP

Department:
Water & Power

Division:
Wastewater

Project Manager:
Tanner Randall

Phone Number:
970.962.3715

Email:
Tanner.Randall@cityofloveland.org

Project Category:
Planning/Construction

Project Number:
NA

Duration:
2022

**Total Project
Cost:
\$1,569,500**

About the Project

Growth and development on the east side of Loveland will drive the need for the East Side Discharge Trunk to the Wastewater Treatment Plant (WWTP) project. The proposed project will create additional wastewater capacity from the Eastside Lift Station discharge location to the WWTP.

Funding Sources

Collection System Corrosion Control

Department:
Water & Power

Division:
Wastewater

Project Manager:
John McGee

Phone Number:
970.962.3760

Email:
mcgee@ci.loveland.co.us

Project Category:
Construction

Project Numbers:
NA

Duration:
2014-2015

**Total Project
Cost:
\$1,012,750**

About the Project

The City's wastewater collection system has a significant corrosion problem resulting from the presence of hydrogen sulfide gas. One way to reduce the gas is to strategically place chemical injection sites throughout the City. The proposed project will greatly slow the degradation of concrete collection lines, manholes, and vaults.

Email:
Tom.Greene@cityofloveland.
org

Project Category:
Construction

Project Numbers:
NA

Duration:
2021

**Total Project
Cost:
\$769,490**

About the Project

As growth continues on the east side of Loveland, the need for additional capacity at the East Side Lift Station will occur. This proposed project will enlarge the lift station to handle the additional wastewater. The lift station upgrades must be coordinated with the East Side Discharge to WWTP project to ensure that downstream capacity is in place for the larger station.

Water Line Replacements

Department:
Water & Power

Division:
Water

Project Manager:
Roger Berg

Phone Number:
970.962.3711

Email:
Roger.Berg@cityofloveland.org

Project Category:
Planning/Construction

Project Number:
NA

Duration:
2014- 2023

**Total Project
Cost:
\$18,643,450**

About the Project

Replacing aging infrastructure is a growing need within the utility. After decades, water pipes, valves, and fire hydrants reach the end of their service life and require increasing maintenance and rehabilitation costs. In some cases, these costs can become unacceptably high and the utility is best served by replacing the facilities. Typically, most communities face increasing replacement costs as the age of installed infrastructure advances.

Extension and Oversizing Projects

Department:
Water & Power

Division:
Water

Project Manager:
Melissa Morin

Phone Number:
970.962.3709

Email:
Melissa.Morin@cityofloveland.org

Project Category:
Construction

Project Number:
NA

Duration:
2014-2023

**Total Project
Cost:
\$910,970**

About the Project

As development on the fringes of the City occurs, private developers design and install water infrastructure to serve their specific project. When the City anticipates additional capacity is desired to serve water needs above and

beyond that which is related to the proposed development, the Utility may require a larger water pipeline to be installed by the Developer. The Utility reimburses the Developer for these increased costs through the Extension and Oversizing program.

970.962.3715

Email:
Tanner.Randall@
cityofloveland.org

Project Category:
Planning/Construction

Project Number:
NA

Duration:
2012-2020

**Total Project
Cost:
\$4,620,250**

About the Project

The northwest region of the City's water service area is currently supplied by a single 24-inch waterline installed in the 1960's. Increasing repair frequency and water demands as well as an increase in the number of water customers relying on this line necessitates a new, alternate waterline. This new waterline will ensure that City customers relying on this critical water delivery system have the supply and redundancy necessary to provide adequate service in the coming decades.

2016-2017

**Total Project
Cost:
\$433,590**

About the Project

The proposed 12-inch waterline connects an existing 12-inch waterline in 10th Street to another 12-inch line in Madison Avenue. Likewise, the proposed 16-inch waterline connects an existing 16-inch line in 50th Street to an existing 12-inch line in 57th Street. The connections will improve hydraulic capacity and will provide additional reliability for each respective area.

2.0 MG Dakota Ridge Tank PZ2

Department:
Water & Power

Division:
Water

Project Manager:
Tom Greene

Phone Number:
970.962.3706

Email:
Tom.Greene@cityofloveland.org

Project Category:
Construction

Project Number:
NA

Duration:
2019-2020

**Total Project
Cost:
\$4,870,130**

About the Project

A 2.0 MG storage tank is needed to meet future demands in the P2 Zone. The timing of the tank is estimated based on the proposed development in the area. The storage will allow the proposed 29th Street pump station P2 expansion to operate more efficiently rather having existing pumps running continuously.

16" in Granite (57th to 50th)

Department:
Water and Power

Division:
Water

Project Manager:
Tanner Randall

Phone Number:
970.962.3715

Email:
Tanner.Randall@cityofloveland.org

Project Category:
Construction

Project Number:

Duration:
2017-2018

**Total Project
Cost:
\$453,250**

About the Project

The 16" waterline will provide a valuable link between the gravity pressure zone and P1. The waterline will ensure adequate pressure and flow to customers in North Loveland.

Water Treatment Plant Expansion

Department:
Water & Power

Division:
Water

Project Manager:
Roger Berg

Phone Number:
970.962.3711

Email:
Roger.Berg@cityofloveland.org

Project Category:
Planning/Construction

Project Number:
W1300D

Duration:
2013-2015

**Total Project
Cost:
\$19,428,780**

About the Project

Beginning 2013, the 94 year old Filter Plant #1 building will be demolished and a new 8 MGD filter building will be constructed in its place. The project will expand the filtration capacity of the WTP to 8 MGD and will provide greater redundancy and level of service for the City customers.

2014-2023 Capital Program Study Session

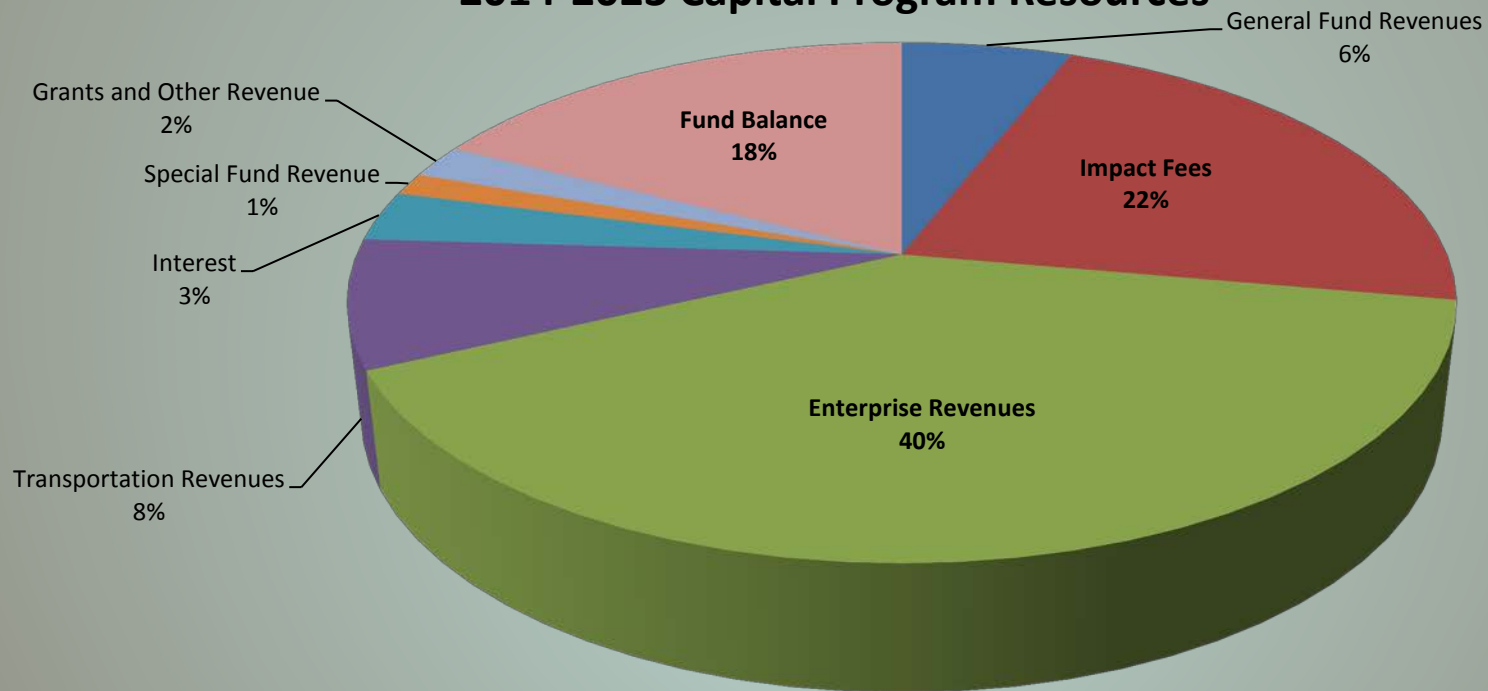

2014-2023 Capital Program

TEN YEAR VIEW

Projected Resources

Total Resources of \$620.6 Million over ten –years

2014-2023 Capital Program Resources

Projected Uses

Total Projects of \$432.0 Million over ten years
Reserves of \$188.6 million

2014-2023 Capital Program Uses

Power Enterprise Major Projects

P. 157

1. System Improvement Program	\$13.4 million
2. 200 Amp Cable Replacements	\$12.0 million
3. Customer Aid to Construction	\$10.7 million
4. New Southeast Substation	\$7.0 million
5. Hydro Generation	\$6.5 million
6. Highway 402 Feeder Extension	\$5.5 million
7. Undergrounding	\$5.4 million
8. Canyon Conversion	\$5.0 million
9. Feeder Extension Program	\$5.0 million

Water Major Projects

1. Water Treatment Plant Exp.	\$18.8 million
2. Water Line Replacement	\$18.6 million
3. East Gravity zone 24" & 16" lines	\$7.4 million
4. 29 th Street Storage Tank #2	\$7.2 million
5. Dakota Ridge Storage Tank	\$4.9 million
6. Morning Drive	\$4.0 million

Transportation Programs

1. Street Rehabilitation	\$49.5 million
2. New Construction	\$17.1 million
a. On-Going Projects	\$7.8 million
b. Reimbursement Projects	\$3.1 million
c. Boise Avenue	\$2.6 million
d. Miscellaneous Projects	\$1.4 million
e. Madison Avenue	\$1.3 million
f. Taft Avenue	\$0.9 million

Wastewater Major Projects

1. Solids Stabilization Capacity	\$11.1 million
2. Digested Sludge Dewatering	\$7.2 million
3. Nutrient Treatment Facilities	\$6.4 million
4. Boyd Interceptor Projects	\$5.7 million
5. Organic Capacity Expansion	\$5.0 million
6. Hwy. 402 Main Extension	\$5.0 million

Other Significant Projects

1. Police Training Facility	\$18.1 million
2. Open Lands	\$16.2 million
3. Museum Expansion	\$15.5 million
4. Garfield & Harrison Outfall	\$11.7 million
5. South Loveland Outfall	\$7.9 million
6. Storm Water Maintenance	\$4.5 million
7. New Neighborhood Parks	\$4.0 million
8. Downtown Improvements	\$3.6 million
9. Loveland Sports Park Exp.	\$3.3 million
10. New Spray Park	\$3.3 million

2014-2023 Capital Program

FIVE YEAR VIEW

Projected Resources

2014-2018 Capital Program Resources

Projected Uses

2014-2018 Capital Program Uses

Power Enterprise Major Projects

1. Hydro Generation	\$6.5 million
2. System Imp. Program	\$5.9 million
3. Highway 402 Feeder Extension	\$5.5 million
4. Customer Aid to Construction	\$4.7 million
5. 200 Amp Cable Replacements	\$3.8 million
6. Valley Substation	\$2.9 million
7. Canyon Conversion	\$2.8 million

Wastewater Major Projects

- | | |
|----------------------------------|----------------|
| 1. Solids Stabilization Capacity | \$11.1 million |
| 2. Nutrient Treatment Facilities | \$6.4 million |
| 3. Organic Capacity Expansion | \$5.0 million |
| 4. Hwy. 402 Main Extension | \$5.0 million |

Transportation Programs

1. Street Rehabilitation	\$22.9 million
2. New Construction	\$8.0 million
a. On-going Projects	\$4.0 million
b. Reimbursement Projects	\$1.5 million
c. Boise Avenue	\$1.0 million
d. Taft Avenue	\$0.9 million
e. Miscellaneous Projects	\$0.6 million

Water Major Projects

1. Water Treatment Plant Exp. \$18.8 million
2. Water Line Replacement \$5.6 million
3. East Gravity Zone 24" & 16" lines \$3.1 million

Other Significant Projects

1. Museum Expansion	\$15.5 million
2. Police Training Facility	\$14.9 million
3. Open Lands	\$13.7 million
4. Downtown Improvements	\$3.6 million
5. Loveland Sports Park Exp.	\$3.3 million
6. New Spray Park	\$3.3 million
7. Records Management System	\$3.0 million
8. Facility Maintenance Projects	\$2.9 million
9. Storm Water Maintenance	\$2.5 million

Significant Issues

- New Colorado Department of Public Health and Environment (CDPHE) Regulations and current organic loadings will require significant improvements to the Wastewater Treatment Plant.
- Three projects that will need to occur through 2017 are:
 1. Upgrades to the Nutrient Removal Facilities \$6.36 million
 2. Increased Solids Stabilization Capacity \$11.08 million
 3. Increased Organic Treatment Capacity \$5.03 million
- This, in combination with the other required projects, will result in the Enterprise being short funding of \$7 million in 2017 and will remain with negative fund balance of about \$2.5 million through 2019.

Issues

- Museum Expansion Project moved back 3 years to 2016-2017.
- Cultural Services CEF revenues not sufficient to fund the \$15.5 million project.
- \$10 million in outside resources are required.
- Reason for inclusion: to attract contributions.
- Recommended funding is 21% Cultural Services CEF, 14% General Government CEF, 64% outside resources.
- Tied to operating funding – potential Science and Cultural Facilities District.

Issues

- The Police CEFs projected revenues will not cover the \$18.1 million project.
- Project to be built in 3 Phases.
- Recommended funding is 40% Police CEF, 37% TABOR Revenue Reserve and 23% General Fund Undesignated Fund balance
