

# Do you or someone you know require accessibility to a sidewalk?

Please help the City of Loveland identify and prioritize locations where **Curb Ramps** need to be installed or repaired.

The Public Works Engineering Department is in the process of developing a new City of Loveland Curb Ramp Program. We would like your help in selecting the locations that require a new ramp installation or ramp repairs.

The information required for this new program is:

1. Intersecting Street Names
2. Corner Location (e.g. southeast corner)
3. Ramp Condition (e.g. no ramp, needs repair, etc.)

Please contact us by email at [engineering@ci.loveland.co.us](mailto:engineering@ci.loveland.co.us) with **ADA Ramps** in the subject line or call 962-2559. Thank you in advance for your contributions.
