

## **Waiver of Liability for Asbestos Exposure**

### **Rialto Bridge Pre-Bid Meeting**

I, \_\_\_\_\_, am an owner, employee, or agent of the undersigned company, which is considering bidding on the Remediation and Demolition Project issued for bid on January 12, 2011. I understand that access to the interior of the Former Quality Shoe Building located at 224 East 4th Street in Loveland, Colorado is restricted and regulated due to damaged and friable asbestos containing materials and debris within the building. I have been provided with an opportunity to read the Terracon Consultants, Inc. report titled "Asbestos Survey, Rialto Bridge Project/Former Quality Shoes, 224 East 4th Street, Loveland, Colorado" dated January 10, 2011, Terracon Project No. 20107030 ("Report"), which describes the extent of asbestos containing materials within the Former Quality Shoe Building.

I understand that:

- Each person who wishes to enter the interior of the Former Quality Shoe Building at the pre-bid meeting for a guided tour will be required to wear appropriate personal protective equipment (PPE) prior to entry and will be required to provide evidence of qualification to use such PPE. Minimum PPE required to enter the Former Quality Shoe building includes: a tight fitting air purifying respirator (APR) equipped with high-efficiency particulate air (HEPA) filtering cartridges; disposable protective coveralls with integrated booties and hood designed to protect against asbestos fibers and dust (such as Tyvek® or equivalent); steel-toed boots; hard hat; and safety glasses. Evidence of qualification to wear the required PPE includes a copy of a medical examination clearing me to wear the APR and a copy of a successful fit test, both completed within the past 12 months. Compliance with other relevant U.S. Occupational Safety and Health Administration (OSHA) regulations is the sole responsibility of each person and his or her employer. [29 CFR 1910.1001]
- Each person who wishes to enter the interior of the Former Quality Shoe Building at the pre-bid meeting for a guided tour shall have completed within the last 12 months, a minimum 2-hour asbestos awareness training course [40 CFR 763.120 and 29 CFR 1910.1001], or training that meets the requirements of the Model Accreditation Plan [40 CFR 763 Appendix C]. If a 2-hour asbestos awareness training course is used to meet this prerequisite, the training must have emphasized among other things: recognition of ACM and PACM, the health effects of asbestos, and ways in which to minimize exposure to ACM and PACM that may be damaged and friable.
- During the guided tour, each person who has entered the Former Quality Shoe Building will be prohibited from eating, drinking, smoking, chewing tobacco or gum, or applying cosmetics (including lip balm) while inside of the Former Quality Shoe Building. 29 CFR 1910.1001]
- During the guided tour, no destruction of walls, floors, or other structures or materials will be permitted.
- After the guided tour, each person who has entered the Former Quality Shoe Building will be required to decontaminate their PPE in the following manner:

- All coveralls worn during the guided tour will be removed and left within the Former Quality Shoe Building. The coveralls will not be returned; rather they will be disposed during planned abatement activities.
- The City will provide wet wipes to be used to decontaminate APRs worn during the guided tour. The wet wipes will be left within the Former Quality Shoe Building, and they will be disposed during planned abatement activities.

I understand, affirm, and agree that I voluntarily waive, release, indemnify, hold harmless, and discharge the City of Loveland, Colorado and Rialto Bridge, LLC, and their respective officers, employees, owners, managers, agents, and assigns, and their contracted entities, from any and all liability, claims, demands, actions, rights of actions, or legal proceedings whatsoever, should I become injured by, or exposed to, asbestos containing materials while in the restricted interior of the Former Quality Shoe Building. I acknowledge that injury associated with asbestos exposure can lead to respiratory illness, and that symptoms of exposure may be significantly delayed in onset.

I have checked the appropriate box below and provided or shown proof of the following documentation at the pre-bid meeting prior to entering the Former Quality Shoe Building:

- ☐ Medical examination clearance for use of an APR
- ☐ Most recent fit test
- ☐ Most recent certificate from asbestos awareness training or training included in the Model Accreditation Plan (i.e., Worker, Contractor/Supervisor, Inspector/Management Planner, Project Designer, or Project Monitor)
