

# *Issues and Opportunities*

## *Golden Eagle Nest Protection*

- Primary resource, also complicates other objectives.

## *Grassland Restoration*

- Several areas are in a degraded condition; will require active restoration that is compatible with other objectives.

## *Recreation Opportunities*

- Key link for regional trail connection and future influx of new residents.

## *Wetland and Riparian Habitat*

- Key habitat element but is reliant on long-term ditch management.

## *Prairie Dog Colonies*

- Active colonies support the golden eagle.
- May complicate grassland restoration efforts.

## *Agricultural Use*

- Existing grazing is consistent with the history and setting.
- Need to determine if grazing is sustainable long term and define a strategy that is compatible with restoration goals.
