Adjustments to Monthly Fee:

A non-residential customer may request an adjustment to the regular fee by one of the following methods in order to allow for less impervious surface than the average for the class of use (Method A) or for on-site detention facilities (Method B). The two methods are not cumulative, and only the method resulting in the lower fee shall be used.

METHOD A: A fee shall be one-half of the regular fee, plus one-half of the regular fee multiplied by the percent of the impervious area multiplied by the class factor. The Commercial class factor is 1.11, the Industrial class factor is 1.174, and the Institutional class factor is 2.49.

METHOD B: A fee shall be one-half of the regular fee, plus one-half of the regular fee multiplied by the ratio of the stormwater runoff rate calculated to result after construction of the detention facilities to the stormwater runoff rate which would occur in the absence of detention facilities.
