# BUILDING DIVISION ROOFING REQUIREMENTS 2021 IRC

## RE-ROOFING PERMIT REQUIREMENTS

REPAIR AREA	PERMIT	REPAIR REQUIREMENTS <sup>a,d</sup>	SHINGLE REQUIREMENTS
LESS THAN 100 SF	NOT REQUIRED	Repair Allowed <sup>b</sup>	To match existing allowed <sup>c</sup>
UP TO 49%	REQUIRED	Repair Allowed <sup>b</sup>	To match existing allowed <sup>c</sup>
50% OR GREATER	REQUIRED	Complete Removal and Replacement	Class 4 Impact Resistance (UL 2218)

**Ice barrier is required. See R905.1.2 for requirements**

**Drip edge is required at eaves and rake edges. See R905.2.8.5 for requirements.**

**Do not re-use existing flashings if buckled, rusted, bent, cracked, or broken. Follow manufacturer's terms for warranties. Replacement to be determined between owner, contractor, and insurance parties.**

- a. Must comply with manufacturer's installation instructions.
- b. Repairs are not allowed where the existing roof has two or more applications of any type of roof covering, regardless of the area of the repair.
- c. Must be a minimum class C (UL 790 fire rating)
  - Class A roof covering is required within LFRA Wildland Urban Interface area. [Link here](#)
- d. Shingle tie-in for adjoining roofs on attached single family residences.
  - Use an approved method by the manufacturer. Capping open seams or weaving new shingles into existing shingles is not permitted (unless specifically approved by the manufacturer).
  - It is recommended to work closely with the homeowner's association and neighboring property owner(s).
- e. Roofing Affidavit (or Roofing Certification) required (attached with application).
  - Completed form states: 1) Class of roof covering installed, 2) manufacturer's installation requirements were met per Loveland area design wind speed, 3) ice barrier was installed per R905.1.2.
  - Printed images of sheathing replacement (if action occurred, before and after), and completed underlayment installation. Include ice barrier with measurement verifying 2 ft. inside exterior wall, valley flashing, sidewall and other flashings, and nailing pattern. Dryer vents shall be provided with backdraft dampers and not have screens.
  - **Submit completed affidavit and date/time stamped pictures of the whole house (showing address) to [buildinginspectionletters@cityofloveland.org](mailto:buildinginspectionletters@cityofloveland.org) 1 day prior to scheduled final inspection. Without pictures, the inspection will be disapproved and must be rescheduled.**

REROOFING REQUIREMENTS		
Removal of Existing Material	R908.3	Roof repair or replacement shall include the removal of existing layers of roof coverings down to roof deck.
	exception	Where roof assembly includes an adhered ice barrier membrane, that membrane is permitted to remain in place and covered with an additional layer in accordance with Section R905
Roof Recover Not Allowed	R908.3.1.1	Where the existing roof or roof covering is water soaked or deteriorating and not adequate as a base for additional roofing
		<b>Where the existing roof has two or more layers of roof covering</b>
		Where the existing roof covering is wood shakes slate, clay, cement or asbestos tile
Sheathing Requirements	R905.2.1	Asphalt shingles shall be fastened to solidly sheathed decks. Water soaked or deteriorating decking must be replaced.
• Spaced lumber decking	CoL	Refer to the manufacturer's technical bulletin regarding requirement's for existing deck boards.

FREQUENTLY ASKED QUESTIONS	
Can I have my roof inspected by the city if I did not pull a roofing permit?	No, a permit is required for any city building inspector to complete an inspection.
May I, as the homeowner, complete the reroof myself?	Yes, if you own the home and are the primary resident.
What is the minimum roof slope I can install asphalt shingles on?	The IRC permits the installation of asphalt shingles on continuous sheathing with slopes as low as 2:12. (R905.2.2) Two layers of underlayment are required for roof slopes up to 4:12, per R905.1.1
What roof covering is acceptable if my slope is less than the 2:12?	Mineral-surfaced roll roofing (R905.5) is allowed to a 1:12 slope. Some Metal roof panels (R905.10), Modified bitumen (R905.11), and Single-ply membranes conforming to section 905.
My roof has no vents, are they required?	Yes, roof replacements will require full compliance as with new installations. See R806 Roof Ventilation. Generally, a roofing manufacturer's warranty will require this.
Is ice and water shield required?	Yes. Not less than 24 in. from the inside of the <i>exterior wall</i> . Roofs greater than 8:12 pitch extend 36 in. inside. Apply on all eaves shingle styled over the required metal drip edge.
Is drip edge required?	Yes. Required at all eaves and rakes.
My house is old and has spaced solid lumber decking for a substrate. Do I need to re-deck it with osb?	Most shingle manufacturer's provide a "technical bulletin" regarding this issue. Follow their instructions.
I have PV solar panels on my roof. Can the roofer remove them and re-install?	No. You must hire a licensed electrician to remove and re-install the panels. List the electrician on the roofing permit application.

**Please note- We DON'T get up on the roof because of liability reasons**

## Prior to submittal of this application, please:

1. Verify your contractor holds a valid City of Loveland contractor license prior to applying
2. If highlighted area is inapplicable, please put N/A
3. Application must be signed by contractor or authorized signer listed on contractor license
4. Please hold onto the attached affidavit. You will submit with required pictures during final inspection. See affidavit for more info.
